

Point of Beginning

Riggs Site Consulting, LLC

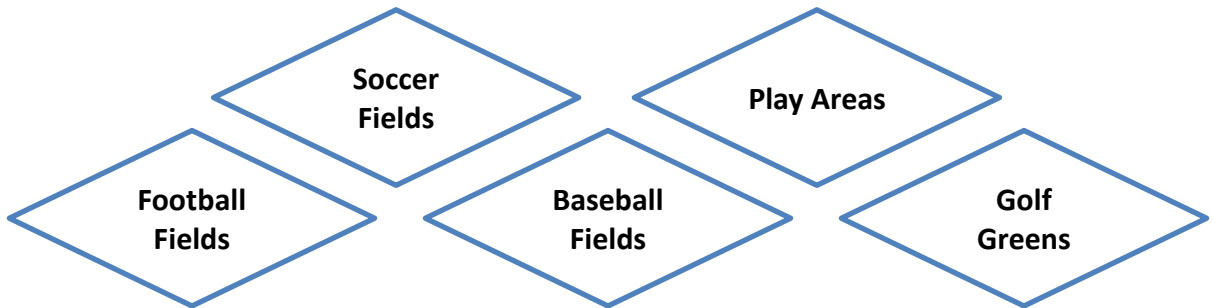

What's your Playability?

Riggs Site Consulting, LLC and Point of Beginning, Inc. are now able to test the G-MAX rating of your field.

Athletes' safety is directly related to the playability of the field they are playing on. Using the same equipment used on NFL fields, we are now able to test a full range of natural and artificial athletic surfaces, pads, and infill materials where hardness or impact characteristics may be monitored for ultimate playability.
